SUMMARY

Full-Stack Developer and Informatics Engineering student with hands-on experience building web and mobile applications using React, Next.js, TypeScript, Laravel, and Flutter. Experienced in frontend/backend development, REST API integration, database management, and deployment across professional, academic, and entrepreneurial projects.

PROFESSIONAL EXPERIENCE

Mobile Developer Intern | RUN System **Aug 2026 - Present**

Flutter • Dart • REST API • Bruno • GitLab • NetBird • Point of Sales

- Contribute to the ACC+ POS mobile application using Flutter and Dart; integrate backend REST APIs and develop warehouse filtering, QRIS payment, receivables settlement, and transaction change features.
- Validate APIs with Bruno, access internal resources through NetBird VPN, and collaborate through GitLab for testing, debugging, source-code management, and deployment workflows.

Founder & E-Commerce Business Owner | Nusticky **Aug 2026 - Present**

- Manage end-to-end e-commerce operations covering product development, branding, pricing, inventory, sales, customer service, and order fulfillment.
- Conduct product and market research while managing financial records and operational processes to support sustainable business activities.

SELECTED PROJECT

Edelweiss Tour & Travel Adventure | Full-Stack Travel Platform **Oct 2026**

Next.js • React • TypeScript • Supabase • PostgreSQL • Cloudflare R2 • SCSS

- Developed a responsive full-stack travel platform with dynamic tour packages and articles, multi-language support, WhatsApp booking integration, and a mobile-focused navigation experience.
- Built an admin CMS with CRUD management, Supabase PostgreSQL/Auth and Row-Level Security, plus Cloudflare R2 object storage for tour, article, banner, and gallery media.

DiProperti | Full-Stack Property Marketplace **Apr 2026 – May 2026**

Next.js • Laravel • MySQL • Docker • Nginx • GitHub Actions • VPS • Vercel

- Developed a full-stack property marketplace with authentication, property comparison, recommendations, mortgage simulation, and an administrative dashboard.
- Integrated frontend, REST APIs, database, and multi-role authentication; containerized services with Docker and supported CI/CD deployment using GitHub Actions, Nginx, VPS, and Vercel.

Semboro Orange Quality Classification | AI & IoT **Oct 2025 - Des 2025**

Python • VGG16 • ESP8266 • MQTT • Web Dashboard Flask

- Developed an orange quality classification system using a VGG16-based image classification model.
- Integrated ESP8266 and MQTT for IoT data communication and built a web dashboard for monitoring classification results and device data.

Cuan Space | Web & Mobile Digital Product Marketplace **Apr 2025 - May 2025**

Laravel • Flutter • MySQL • REST API • Payment Gateway

- Led development of integrated Laravel web and Flutter mobile marketplace applications, coordinating feature development and project execution.
- Implemented payment gateway integration, multi-role authentication, secure digital product delivery, and database-driven application workflows.

EDUCATION

Jember State Polytechnic

- Bachelor of Applied Science in Informatics Engineering | GPA: 3.80 / 4.00

TECHNICAL SKILLS

- **Frontend :** React, Next.js, TypeScript, JavaScript, HTML, CSS
- **Mobile :** Flutter, Dart
- **Backend & API :** Python, PHP, Laravel, REST API, API Integration
- **Database :** MySQL, PostgreSQL
- **DevOps :** Docker, Nginx, GitLab, GitHub Actions, VPS, Vercel, Git, Grafana, Prometheus
- **Tools :** Bruno, NetBird, GitHub, Figma, VS Code
- **Additional :** MQTT, ESP8266, VGG16
